

## THE PEACH

The peach tree, originally from China, is one of the first trees to blossom in the spring. It is the symbol of the renewal of life. Indeed, the Chinese associate it with fertility and use peach blossom during marriage ceremonies.

The Japanese add virginity and fidelity to these virtues. However, amongst all of the symbols associated with the peach, immortality is the most important.

## CRÈME DE PÊCHE DE VIGNE

18% VOL.

WILD PEACH LIQUEUR

The small "pêche de vigne" (wild peach) is so named thanks to the tint of its flesh, which evokes the colour of wine lees. Made with wild peaches gathered in Burgundy, Trénel's Crème de Pêche de Vigne is a beautiful brilliant golden colour, with an amazingly fresh and pure, intense nose that exudes the distinctive fruity notes characteristic of this variety of peach. The fruity flavours explode on the palate, powerful and rich but never cloying.
